Self-motivated Software Developer | System Engineer with a Bachelor of Arts (B.A.) in Computer Science and Management from Wisconsin International University College with 2 years experience in Software Development, Database Design, Development, and Maintenance, Application Deployment and Payment Integration.

Experienced at communicating with key stakeholders in accessing project needs and managing projects related to software, database and network installation and migration, server visualization, and end user computing.

Officially, my job is to develop enterprise application and databases for small, medium and large organizations.

But really, I make the web and mobile users fall in love and addicted to their devices.

I am experienced in web development using PHP, MYSQL, JAVASCRIPT, JQUERY, TWITTER BOOTSTRAP, CSS3 and HTML 5. I have a working experience with Model View Controller (MVC) and have been involved in maintaining versions of source code using Github. I have also designed and developed web user controls, master pages, validation controls, CSS files using technologies like AJAX Toolkit, JQuery, JavaScript, JSON, and XML.

When working on a new project, I like to speak with my clients so that I can have a clear understanding of their needs and vision of the project. Thank you in advance for your time and consideration. I look forward to working with you soon

## EDUCATION

AUG2011 – JUN2015 Bachelor of Arts Computer Science

WISCONSIN INTERNATIONAL  
UNIVERSITY COLLEGE WC

## EXPERIENCE

MAY2017 – Current	<p>Software Developer :: Innovationist</p> <p>Mentored by senior software architects and app developers on how to design, implement and manage complex projects as well as helping me build critical business skills</p>	<p>MICROSOFT APP FACTORY, MOBILE WEB GHANA</p> <p>UPLOAD YOUR LOGO</p>
